

As technology changes and advances, so does the work that we do and how we do it. With new tools and capabilities, we are already seeing our workplaces change as a result of advanced technology. Whether it's Artificial Intelligence, managing remote teams, or identifying future key skill sets, managers should challenge themselves by considering the impact of advancing technology on the workplace.

Breaking Down Artificial Intelligence in the Workplace

by Chemistry Team

Business owners and managers should give some consideration to how Artificial Intelligence could affect their workplace including the way we do work, the kinds of skills we will need moving forward, and how our workplaces will look in the future.

Quotes on Technology & Change

Technology is nothing.

What's important is that you have a faith in people, that they're basically good and smart, and if you give them tools, they'll do wonderful things with them.

Steve Jobs, Co-Founder of Apple

We cannot change what we are not aware of, and once we are aware, we cannot help but change.

Sheryl Sandberg, COO of Facebook

There are many people whose jobs are to drive. I think it might be the single largest employer of people. So we need to figure out new roles for what those people do, but it will be very disruptive and very quick.

Elon Musk, CEO Tesla
